

**IS440.X**

## IS440.1 – ATEX CERTIFIED COMMUNICATOR

---

- 5G ATEX certified communication device in RSM design (small, very compact housing for an ATEX 5G broadband device).
- PTT communication without limits → all devices (worldwide) with the respective PTT application can communicate with each other (group communication).
- The IS440 serves the current need for broadband communication devices for migration (substitution) from DMR/TETRA to broadband-based standard devices.
- Great savings potential in the area of maintenance → Substitution of the DMR/Tetra systems. The 4G/5G infrastructure, which already exists or is being further expanded as part of Industry 4.0, can be used. Advantages for the user: low maintenance costs, high reliability...
- Additional options compared to classic Tetra/DMR devices → 2.4" display, video (surveillance + conference), third-party APKs possible: e.g. Lone Worker Protection, localization.
- Integration into MDM infrastructure possible (legacy client).
- Target group: System providers of PTT communication solutions. All major PTT vendors supported like Motorola (**Wave**), **Nokia**, **TASSTA**, Airbus (**Agent**), Mobile Tornado (**Instant Talk**) etc.).

## IS440.1 – ATEX CERTIFIED MOBILE 5G HOTSPOT

---

- With a special software extension and a more powerful battery, the IS440.1 becomes a powerful Atex 5G hotspot that brings WiFi-based devices such as the HMT into the 5G network.
- Up to 32 WiFi-based devices can be connected to the IS440.1 at the same time and connected to the Internet based on 5G.
- “White lists” can be created for authorized devices.
- Advanced DHCP/DNS management.
- Web interface for external administration (this is not standard on an Android based device).
- Battery life time in hotspot operation > 8h
- Target group: Anyone who wants to bring a WiFi-based device into the 5G network in the Atex area.

## IS440.1 – COMMUNICATOR – 1ST ATEX 5G PTTOC (MCPTT) DEVICE

- Explosion-proof communication device
- Use of existing digital networks (4G & 5G)
- Substitution of DMR and TETRA devices
- Dedicated device for PoC and lone-worker-protection
- Additional functionality (more than DMR/TETRA)
  - Android OS (AOSP) no GMS!
  - Camera for video call and surveillance
  - Sensors for LWP capability + tracking
  - SOS button
  - 2,4" display
  - Hotspot capability (WiFi/Bluetooth ↔ 4G/5G)

→ No GMS → no Zero Touch → only MDM legacy clients possible!

# IS440.1 – ID

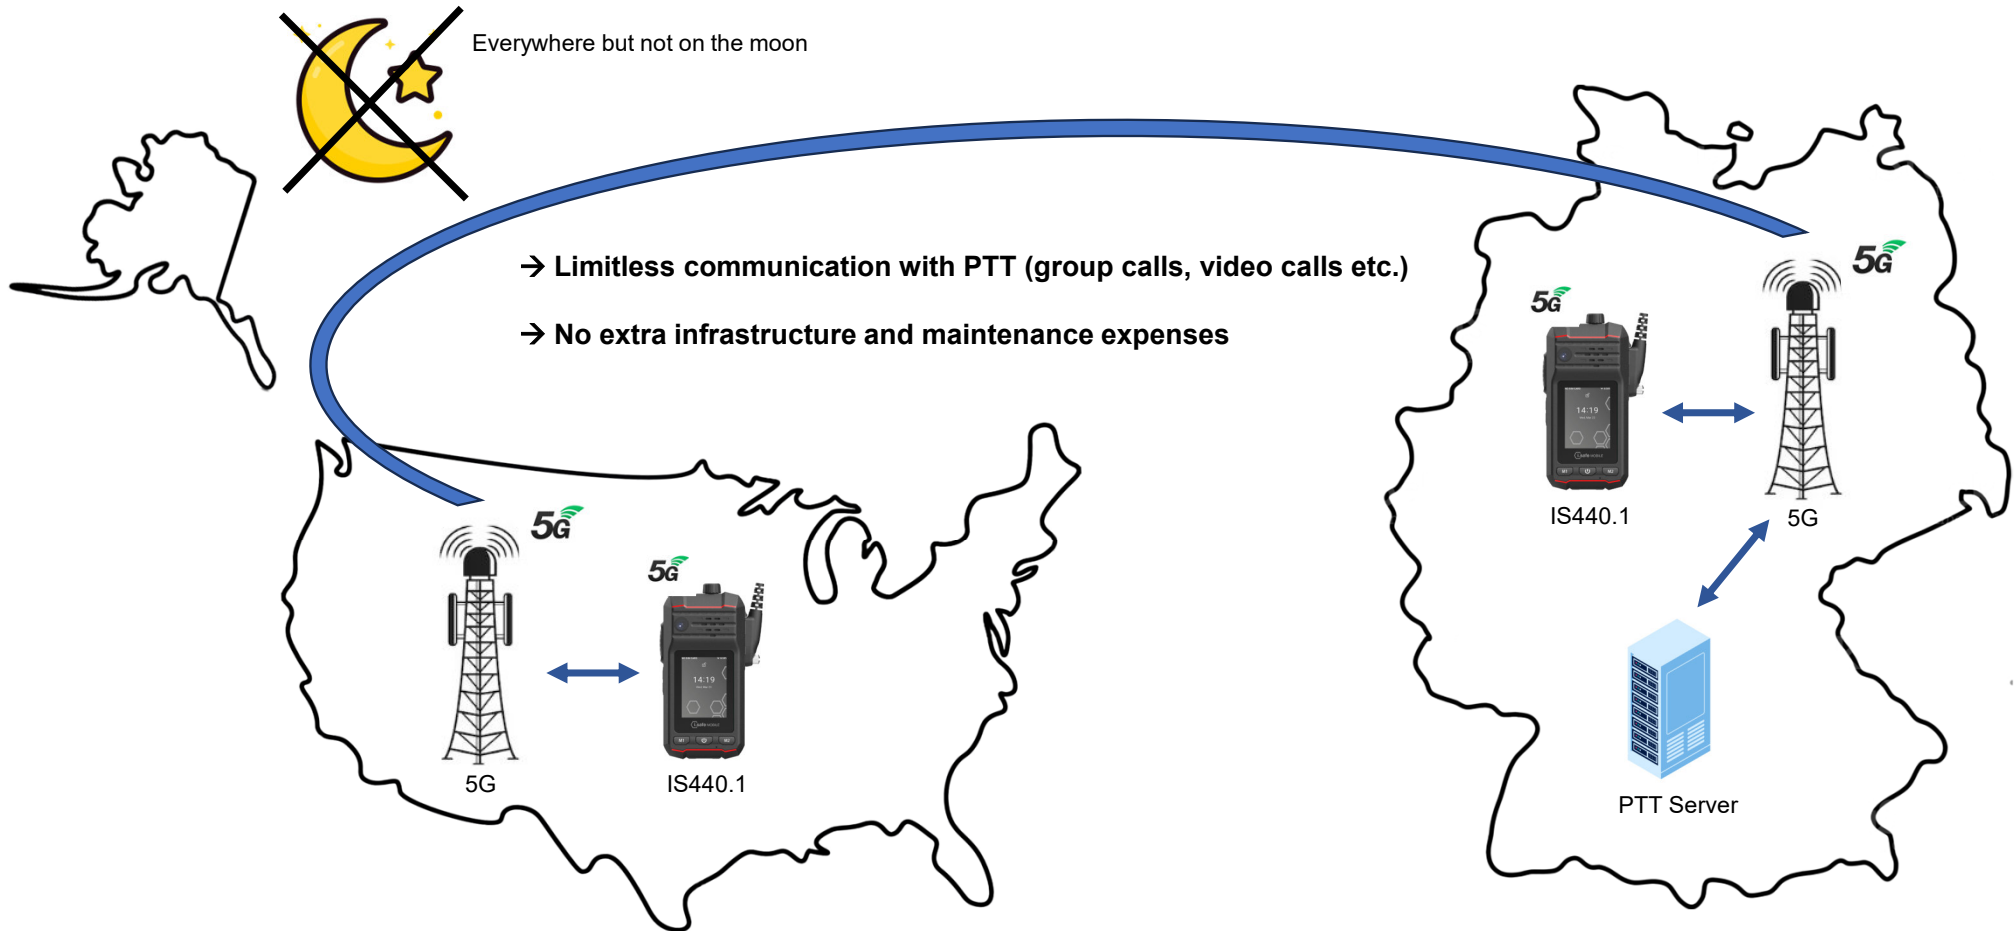

# IS440.1 – COMMUNICATOR – SUBSTITUTION OF DMR'S

***As long as the substitution is not yet complete, the various systems can communicate with each other via a central conversion server.***

# IS440.1 – COMMUNICATOR – PTT WORLDWIDE

# IS440.1 – TECHNICAL SPECIFICATION

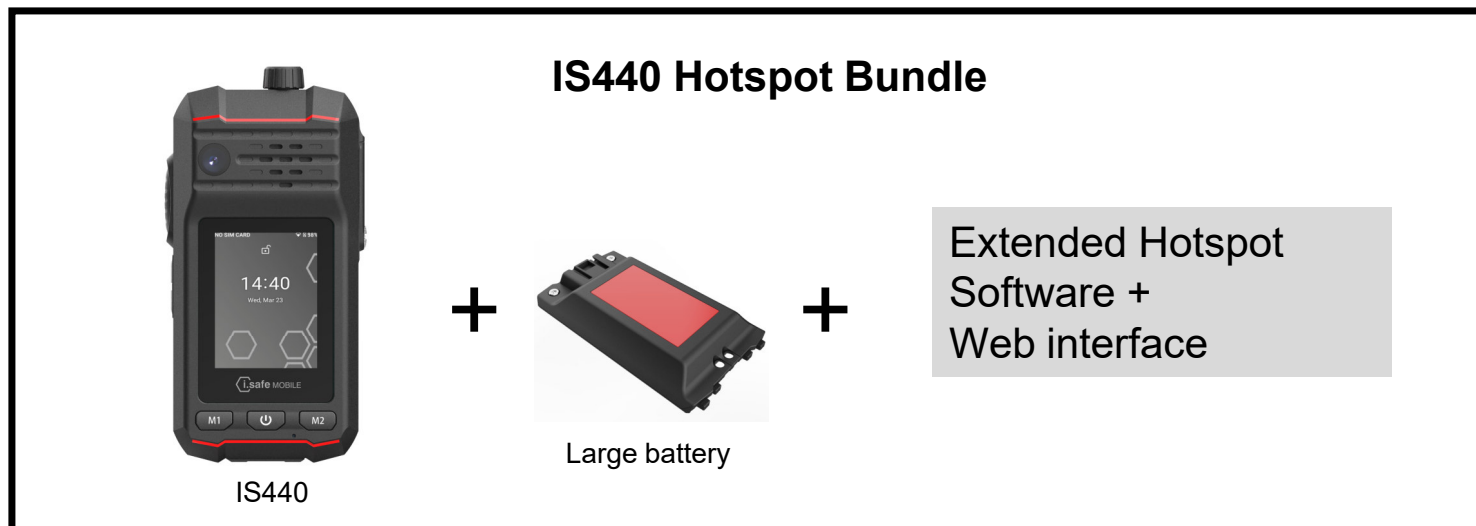

<b>Operating system</b>		ISM-OS
<b>Processor</b>		Qualcomm QCM6490
<b>Memory</b>		4 GB RAM 64 GB internal memory
<b>Frequency bands</b>	4G - FDD	1 / 2 / 3 / 4 / 5 / 7 / 8 / 12 / 13 / 14 / 17 / 20 / 25 / 26 / 28 / 29 / 30 / 66 / 68

# IS440.1 – „HOTSPOT BUNDLE“

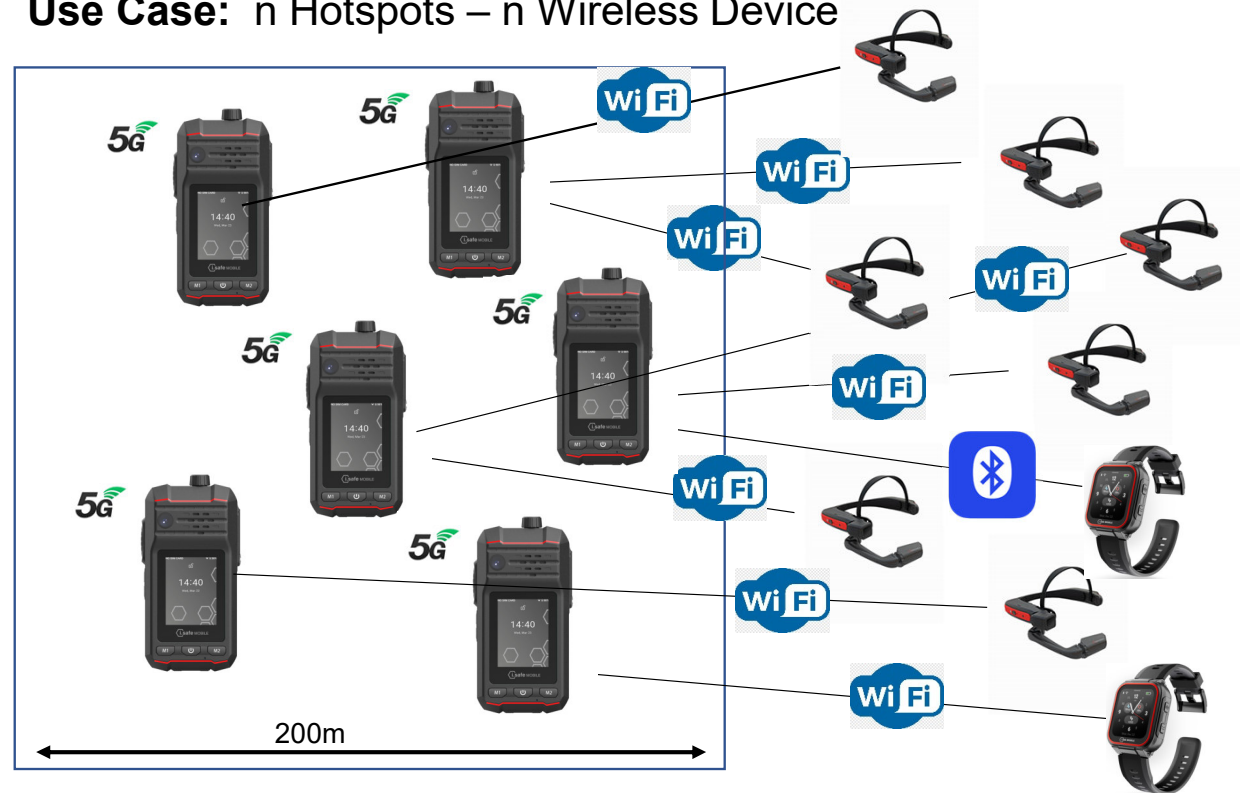

# IS440.1 – „HOTSPOT BUNDLE“

## Additional Hotspot Features:

- Connected devices: 32
- Turn off time setting possible
- DHCP&DNS:
  - first/last IP address can be set
  - max. number of clients can be set
  - lease time can be set
- IPv6 (IPv4 standard)
- White list for authorized devices
- User interface + Web interface for external configuration
- Battery 4.800 mAh > 8h running time

## Use Case: n Hotspots – n Wireless Device

All authorized devices (UEs) have access to the distributed Mobile Routers in the area and select always the best WiFi connectivity
